## MARANTZ DESIGN AND SERVICE

Using superior design and selected high grade components, MARANTZ has created the ultimate in stereo sound. Only original MARANTZ parts can insure that your MARANTZ product will continue to perform to the specifications for which it is famous.

Parts for your MARANTZ stereo are generally available within 72 hours throughout the nation via a toll-free line to our National Parts Depot in California. The sales professionals who take your call immediately refer to their own desk top computer terminal and can quickly determine the availability and price information you require. If for some reason, your order should exceed our available stock, we usually can instantly provide an alternate replacement part or current delivery information. When the order is placed and confirmed, the computer simultaneously generates "hard copy" orders at the distribution center. As hard copies come directly from the computer to the national parts depot, your requested stock is assembled and prepared for shipment and placed on the first available carrier for delivery to you.

### ORDERING PARTS

Phone orders will eliminate mail delays, and we encourage the use of this method. If you order by mail, use MARANTZ parts order forms which are available from our National Parts Depot located at the following address:

The following information must be supplied to eliminate delays in processing your order:

1. Complete address.
2. Complete part numbers.
3. Complete description of parts.
4. Model number for which part is required (indicate MARANTZ).
5. Account number (for account customers only).

Direct consumers will be provided with the current retail price quotation on available parts in order to advise them of the cost of the parts and shipping.

## 1. ADJUSTMENT PROCEDURE

### 1.1 Idling Current Adjustment

#### Procedure

Set the volume control to minimum. One minute after turning the power switch on, adjust so that 6 mV is obtained at each test point.

### 1.2 Power Meter Adjustment

	L ch	R ch
Adjustment	RX07	RX08

#### Procedure

- 1) Connect an 8 ohm load to the speaker terminals and apply a 1 kHz signal to the AUX jacks.
- 2) Set the volume control to the maximum and adjust the input so that the speaker output is 17.9V.
- 3) Turn RX07 and RX08 until just before QX18 and QX19 light.
- 4) Decrease the input and increase it again to confirm that QX18 and QX19 light up when the output is 18.5V.
